Supporting Work for "Non-contact" Tax Payment

Background

During the COVID-19 pandemic, the "non-contact" tax payment has shown great advantages in digitalisation of tax administration.

As of the end of June 2020, **59 million** taxpayers in China have registered Electronic Taxation Bureau, accounting for **90.73%** of the total number. Taxpayers conducted **106.77 million** items of business through the Electronic Taxation Bureau, accounting for **73.32%** of the total volume.
